5G will bring a huge increase in radiation, virtually overnight, everywhere—in cities, suburbs, parks, nature preserves, wildlife refuges, oceans, Greenland, and Antarctica. Instead of cell towers every few miles, there will be cell towers—small but powerful—in front of every third to fifth home. Instead of 2,000 satellites orbiting the Earth, there will shortly be 50,000.

There is now an International Appeal to Stop 5G on Earth and in Space, which calls on the world's governments. To support this effort, we are offering contemplative prayers that support human life, plant life, animal life and spirituality. The Vigil combines contemplative music and time for reflection to inspire collective faith and hope. You are invited to join us in *Prayers, Poems and Blessings* from around the world including prayers for healing, prayers for life, and prayers of the Saints.
