GLOBAL PROTEST DAY RESOUNDING SUCCESS

Saturday January 25th was a tremendous day: Around the world people came together to say no to the inescapable and harmful radiation now being rolled out as 5G, and demanding their voices be heard and their Human Rights respected.

All in all there were [270 Stop 5G Events in 38 countries](#). Several cities, such as Amsterdam, Munich and Geneva had large turnouts. But there were also many other colorful Events across the world from New Zealand to Estonia, from Bolivia to Greenland. Together these Protest Day Events moved the counter 5G movement to a new level of energy and awareness.

For pictures of an amazing array of Events kindly see the Global 5G Protest Facebook site: <https://www.facebook.com/groups/548912049259423/?ref=bookmarks>

and the website, <https://www.stop5ginternational.org>

NB: This is only the beginning of a series of local and global events: Next Global Protest will be Saturday, April 25th (with an alternate day Sunday, April 26th). The world is awakening.
